

# BABY PALM COIN (BPC) WHITEPAPER

**Issued:** 08/08/2025

**Blockchain:** Ethereum (ERC-20 standard)

**Website:** <https://babypalm.io>

## 01. ABSTRACT

Baby Palm Coin (BPC) is an ERC-20 token launched on 08/08/2025 as part of the Baby Palm NFT ecosystem. The project aims to connect digital art and meme culture with practical token mechanics. BPC rewards NFT holders via airdrops, supports community engagement, and provides a foundation for future Baby Palm artwork collections.

## 02. THE CHALLENGE

The NFT and meme-coin space faces issues such as:

- Lack of Utility: Many tokens have no clear use beyond speculation.
- Low Liquidity at Launch: Thin pools discourage trading and harm trust.
- Fragmented Ecosystems: Tokens and NFTs often exist in silos without synergy.
- Unclear Security Practices: Unverified contracts and unlocked liquidity increase risk.

## 03. THE SOLUTION

Baby Palm Coin addresses these problems with:

- NFT Airdrop Rewards: Active Baby Palm NFT holders receive BPC distributions.
- Liquidity Commitment: ETH/BPC pools seeded and LP tokens secured in a multisig wallet.
- Community Ecosystem: Token tied directly to artwork releases and community events.
- Verified Transparency: Contract verified on Etherscan; liquidity locks published.

## 04. ROADMAP & MILESTONES

### Phase 1 – Pre-Release (Completed):

- Contract deployment & verification
- Initial liquidity on Uniswap
- Safe multisig setup

### Phase 2 – Alpha Release (Current):

- NFT development
- Community testing & trading
- Token profile updates (Etherscan, trackers)

### Phase 3 – Promotion & Listings:

- CoinGecko & CMC submissions
- Liquidity expansion
- NFT Drop
- Marketing campaigns targeting NFT and meme audiences

### Phase 4 – Ecosystem Expansion:

- New Baby Palm artwork collections tied to BPC rewards
- Exploration of governance features
- Partnerships with NFT and meme communities

## 05. TECHNICAL INFORMATION

- Standard: ERC-20
- Decimals: 18
- Supply: 1,000,000,000
- Consensus: Ethereum Proof-of-Stake (PoS)
- Wallets Supported: MetaMask, Trust Wallet, WalletConnect, Safe
- Transparency Measures: Contract verification, Safe-managed funds, LP lock

## 06. TOKEN ECONOMICS

**Token Name:** Baby Palm Coin

**Symbol:** BPC

**Total Supply:** 1,000,000,000

**Distribution:**

- **NFT Airdrops & Liquidity: 35%**  
Allocated to seed initial Uniswap liquidity pools and provide ongoing airdrop rewards for Baby Palm NFT holders and early adopters.
- **Economics & Treasury (Safe multisig): 35%**  
Reserved for exchange listings, ecosystem development, marketing, and partnerships. Managed transparently through a Safe multi signature wallet.
- **Team Allocation: 10%**  
Distributed under a vesting schedule with a 12-month cliff and 24-month linear release to align team incentives with long-term growth.
- **Partner Support & Community Rewards: 20%**  
Dedicated to collaborations, influencer partnerships, and event-based rewards to grow and sustain the Baby Palm Coin ecosystem.

## 07. UTILITY

- **NFT Rewards:** Periodic airdrops for Baby Palm NFT holders.
- **Community Incentives:** Used in events, promotions, and ecosystem experiments.
- **Liquidity & Trading:** Active Uniswap pool ensures accessibility.
- **Future Integration:** Baby Palm artwork and collectibles tied to token ownership.

## 08. ISSUER INFORMATION

- **Project:** Baby Palm Coin (BPC)
- **Launch Date:** 08/08/2025
- **Entity:** Community-driven project
- **Contact:** E: [hello@babypalm.io](mailto:hello@babypalm.io) W: <https://babypalm.io>

## 09. RISK DISCLAIMER

Participation in Baby Palm Coin carries risks including market volatility, potential contract vulnerabilities, and regulatory changes. The token is not an investment guarantee and may lose value in part or full. BPC is a community project and not covered by any investor protection or deposit guarantee schemes.
